

Education & Training

NodeSource has designed a training curriculum to address the specific needs of Enterprise Companies working with Node.js.

NodeSource training courses cover a broad range of Node.js topics and experience levels: for teams just getting started with Node, or those tackling advanced topics like performance tuning and DevOps, or even those looking to establish best practices for Node.js development, deployment, and troubleshooting.

Benefits:

- ✓ Expert instructors who use real-world experience of working on some of the largest Node.js production deployments worldwide
- ✓ Training delivered for maximum effectiveness and retention through a combination of instructor-led training and hands-on labs
- ✓ Courseware that can be customized to align with the experience level of your teams
- ✓ Training delivered online and can be recorded for future internal use

Courses:

JavaScript for Node.js Training

A two-day crash course of JavaScript fundamentals focusing specifically on server-side development with Node.js rather than traditional browser-based development.

npm Training

An introduction to npm, its methods, and how to best utilize npm in an enterprise setting, including understanding Node.js dependencies, npm installation and establishing a private, on-premise npm registry.

Node.js Fundamentals Training

A comprehensive three-day crash-course in Node.js development, focusing on the core competencies required to develop Node.js applications for the enterprise.

Node.js DevOps Workshop

This workshop prepares operations teams and related personnel for running Node.js in production. They will investigate and learn operations concerns specific to Node.js and the best use of existing systems tools for Node.js application deployment.

Node.js Testing and Training

The Test Driven Development Training course aims to teach basic Node and asynchronous testing patterns and libraries to developers with a Test-Driven Development (TDD) approach.

Performance Workshop

Designed to help developers and operations engineers to gain a deep understanding of the inner workings of Node.js and v8, with an eye on fine-tuning code decisions and deployment for maximum speed and efficiency at runtime.

Why Engage NodeSource for Training?

NodeSource is dedicated to creating a self-sustaining Node.js ecosystem for your organization.

We aim to drive and expand market adoption of Node by providing innovative software products and expert services and training that empowers enterprise, government, and other professional organizations to use Node.js most effectively. NodeSource is the enterprise Node.js company - why trust your training to anyone else?

These companies have engaged NodeSource for their Node.js training:

“I’ve learned more about Node.js in 2 days than I have working with it for a year.”

Øistein Sørensen

Lead Developer, Finn

“I cannot imagine more qualified instructors.”

Derrick Stone

Director, Software Development

“Well-planned syllabus, subject expertise, good communicators, lots of great real-world advice and examples, flexibility in topics discussed. This was one of the best trainings I have ever attended. Engineers here were raving about the quality and usefulness of this training.”

Kevin Delgadillo

Sr. Manager, Product Management
